

JOEL JACKSON

DJ / PRODUCER
GENRE - COOL LOUNGE THROUGH
TO FUNKY TECH HOUSE

Fascinated by vinyl records for as long as he can remember and grounded on musical influences from rock n roll, classical, Blues & Roots, Funk, Soul, Disco, 80's Electronica, Pop and Old School Hip Hop. Such diversity shines through with every performance tailored to it's individual surroundings and needs.

With a unique DJ career spanning over ten years down the East Coast of Oz. Joel is best known as one of the coasts' pioneers of pushing the-once unpopular and little-known sounds of Progressive and Deep Tech-house, into the ears of the Underground party scene. These sounds have since become a more dominant sound on the airwaves and in the dance industry.

His intuitive musical ability has allowed him to appeal to all listeners and crowds without succumbing to the commercial hits of the day and always opting for a unique and alternative sound in his set construction.

A creative across the board, he has studied Music Theory and Production at the renowned Qld Conservatorium of Music mentored by music industry professionals at the top of their game such as Gavin Carfoot.

Not only restrained by DJing, he is currently working on multiple productions varying from audio production and remixes to producing and directing film. He will be showcasing his debut works in the coming months with a detailed documentary on House Music and culture. Also in the pipeline is the development of his Production Label: 3am South Records.

Passionate about music and life, excited about the future while inspired by the past, Joel is sure to achieve great heights in the industry while living out his dream. Be sure to keep a close eye on this space.
